Personal Statement

Unity programmer with 4+ years of commercial experience across gameplay, systems, multiplayer, rendering and multi-platform development. Experienced in shipping and porting Unity titles across PC, console and mobile. Comfortable taking ownership of features and projects, from early prototyping through to production and release.

Skills

Languages: C#, C++, JavaScript, Python

Unity: Unity, Shader Graph, HLSL, FMOD

Networking/Backend: Photon Fusion, FishNet, PostgreSQL, MongoDB

Tools: Git, Perforce, SVN, Jira, Bash

Other: Level Design, Voice Acting, Unreal, PixiJS, Prototyping

Experience

Cloth Cat Games | Programmer (Unity) | (05/2025 - Present)

- Planted - Gameplay/network programmer responsible for several multiplayer levels and their single-player counterparts, including gameplay and networked systems.
- Project lead in developing a prototype for an external client, coordinating development from early concept through vertical slice.

Hyper Luminal Games | Programmer (Unity) | (03/2023 - 05/2025)

- Laika - Sole programmer responsible for porting, in the process of doing so I created a toolkit which was then used to port future titles.
- Pine Hearts - Responsible for setting up motion controls on the Switch and touch controls on mobile.
- The Precinct - Responsible for animation programming, vehicle physics and bugfixing/polish to get the project ready to release.

Crucible Gaming | Game Developer (Pixi JS, C# backend) | (09/2022 - 03/2023)

- Contributed to an in-house engine used to develop digital games in PixiJS and HTML/CSS.

Education

Physics | Cert. Higher Education (Loughborough University) | (06/2014-06/2015)

Professional Projects

Planted | Gameplay and Network Programmer, Level Design | [STEAM](#)

Gameplay systems, networked gameplay, level design, ProBuilder, Blender, Photon Fusion

The Precinct | Animation, Physics and Gameplay Programmer | [STEAM](#)

Gameplay systems, animation state machines, vehicle physics, scripted events, debugging & optimisation

The Day I Became A Bird | Animation, Systems Programmer

Animation state machines, dialogue systems, quest/objective systems, player input & visual scripting tools

Pine Hearts | Porting Programmer | [STEAM](#)

Nintendo Switch & mobile porting, HLSL, URP, motion controls & touch input

Laika: Aged Through Blood | Porting Programmer | [STEAM](#)

Multi-platform porting, rendering, shader development, SRP, HLSL/PSSL & performance optimisation

Hellboy Web of Wyrd | Porting Programmer | [STEAM](#)

Multi-platform porting, URP, Shader Graph & graphics development

RadRabbit | UI/UX Programmer | [APP STORE](#)

UI/UX systems, application flow, state management & systems architecture

Venture Valley | Network Programmer | [STEAM](#)

Live-service systems, Unity Gaming Services, Cloud Code & tournament functionality

Prototypes/Unreleased

Looted | Primary Programmer, Level Design - Cloth Cat Games/Good Gate Media
Dialogue system with persistence and choices, bespoke mechanics, compute shaders, level design and gameplay design

Project N/WWW | Primary Programmer, Level Design - Hyper Luminal Games
Prototyping, Custom Physics, Systems Architecture, Multiplayer (Photon)

Volunteering/Extracurricular

I have helped to organise multiple fundraising charity cabarets for Mind, as well as LAN parties where proceeds went to Child's Play, these events included tournaments for the around 250 attendees.

I play four instruments and sing, and I have a huge passion for music and the arts. I work freelance as a voice actor, having supplied my voice to companies including Amazon, Marvel, Shopify, and more!
