Personal Statement

If there's anything I love, it's the satisfaction you get from finally cracking a difficult problem. I'm calm under pressure, easy to get on with, and confident in my skills. I love working with others to bring something to life. Passionate about storytelling, both through expansive narratives and tight gameplay.

Skills

Languages: C#, C++, JavaScript, Python

Game Development: Unity, Unreal, Shader Graph, HLSL, FMOD, PixiJS

Backend & Databases: Photon (Fusion), FishNet, PostgreSQL, MongoDB

Version Control: Git, SVN, Perforce

Other: Bash, Jira, Prototyping, Voice Acting

Experience

Cloth Cat Games | Programmer (Unity) | (05/2025 - Present)

- Product lead for external client project, responsible for creation of a vertical slice and coordination between the client and the studio
- Working with filmmakers to bring a narrative to life in an interactive world, helping to shape their ideas from something that works in the cinema into a game
- Working alongside the rest of the studio to help complete their competitive multiplayer game using Photon Fusion, taking ownership over creation of two levels and the unique gameplay gimmicks that accompany them

Hyper Luminal Games | Programmer (Unity) | (03/2023 - 05/2025)

- Generalist programmer, focus on **gameplay, systems, UI, animation, and physics**
- Creation of **tools** for **console development**, motion controls, touch controls, level design
- **Prototyping** and pitch development including for **networked multiplayer** games
- Extensive experience in **co-dev** and **porting** external clients' games to all modern consoles

Crucible Gaming | Game Developer (Pixi JS, C# backend) | (09/2022 - 03/2023)

- Contributions to in house engine used to develop digital games in PixiJS and HTML/CSS
- Server side validation and sanitisation, integration with C# backend

Education

Physics | Cert. Higher Education (Loughborough University) | (06/2014-06/2015)

Studying physics at Loughborough University I spent much of my time learning mathematics, problem solving, and algorithmic logic. This gave me exposure to high mathematical concepts including data structures and algorithms, and mechanical equations which I frequently use when manipulating objects.

Professional Projects

Planted | Unity - Gameplay and Network Programmer, Level Design | [STEAM](#)
C#, Photon Fusion, ProBuilder, Blender

The Precinct | Unity - Animation, Physics and Gameplay Programmer | [STEAM](#)
C#, Animation FSM, Vehicle Physics, Scripted Events, Bug Fixing and Optimisation

The Day I Became A Bird | Unity - Animation, Systems Programmer
C#, Animation FSM, Dialogue, Quests/Objectives, Input, Graphical Scripting Tools

Pine Hearts | Unity - Ported to Switch and mobile | [STEAM](#)
C#, HLSL, URP, Motion Controls, Touch Controls

Laika: Aged Through Blood | Unity - Ported to all modern platforms | [STEAM](#)
C#, HLSL/PSSL, SRP, Rendering, Optimisation

Hellboy Web of Wyrld | Unity - Ported to all modern platforms | [STEAM](#)
C#, ShaderGraph, URP, Porting

RadRabbit | Unity - Mobile, UI/UX Programmer | [APP STORE](#)
C#, App Flow, State Management, Systems Architecture

Venture Valley | Unity - Mobile, Live service, tournaments | [STEAM](#)
C#, UGS, Unity Cloud Code

Prototypes/Unreleased

Looted | Unity - Gameplay, Network, Level Design - Cloth Cat Games/Good Gate Media
C#, Game Design, Level Design, Narrative Design, Sound Design, Project Lead, Graphics Programming, Shadergraph

WWW | Unity - Gameplay, Network, Graphics Programmer - Hyper Luminal Games
C#, Shadergraph, Prototyping, Systems, Multiplayer (Photon), Pitch Materials

Project N | Unity - Gameplay, Physics Programmer - Hyper Luminal Games
C#, Prototyping, Custom Physics, Systems Architecture, Pitch Materials

Volunteering/Extracurricular

I have helped to organise multiple fundraising charity cabarets for Mind, as well as LAN parties where proceeds went to Child's Play, these events included tournaments for the around 250 attendees.

I play four instruments and sing, and I have a huge passion for music and the arts. I work freelance as a voice actor, having supplied my voice to companies including Amazon, Marvel, Shopify, and more!
